OOPJ CCEE Practice Quiz 2

The respondent's email (**rushikesh.sambare.cmfeb26@gmail.com**) was recorded on submission of this form.

Static blocks execute when: *

- ○ Object created
- ◉ Class loaded
- ○ Method called
- ○ Never

Feedback

Correct ✅

What will be the output? *

```
class Test {
   static int x=5;
   public static void main(String[] args){
      Test t1=new Test();
      Test t2=new Test();
      t1.x=10;
      System.out.println(t2.x);
   }
}
```

- ○ 5
- ◉ 10
- ○ 0
- ○ Error

Feedback

Correct ✅

Which keyword is used to explicitly throw an exception? *

- ○ throws
- ◉ throw
- ○ catch
- ○ finally

Feedback

Correct ✅

Static variables are: *

- ○ Per object
- ◉ Shared
- ○ Constant
- ○ Local

Feedback

Correct ✅

Can interface have static methods? *

- ○ Yes
- ◉ No
- ○ Only abstract
- ○ Only default

Feedback

Incorrect ❌

What happens if no constructor is defined? *

- ○ Error
- ◉ Default constructor created
- ○ Runtime error
- ○ Nothing

Feedback

Correct ✅

What will happen? *

```
interface I {
   void show();
}
class Test implements I {}
```

- ○ Compiles
- ○ Runtime error
- ◉ Compilation error
- ○ No output

Feedback

Correct ✅

The throws keyword is used: *

- ○ To handle exception
- ○ To declare exception
- ○ To catch exception
- ◉ Ignore exception

Feedback

Incorrect ❌

Which keyword is used to implement interface? *

- ○ extends
- ◉ implements
- ○ interface
- ○ inherit

Feedback

Correct ✅

What will be the output? *

```
try {
   System.out.print("A");
   return;
} finally {
   System.out.print("B");
}
```

- ○ A
- ○ B
- ◉ AB
- ○ Error

Feedback

Correct ✅

What will be the output? *

```
try {
   int x = 10 / 0;
} catch (ArithmeticException e) {
   System.out.print("A");
} finally {
   System.out.print("B");
}
```

- ○ A
- ○ B
- ◉ AB
- ○ Error

Feedback

Correct ✅

Which is NOT an OOP principle? *

- ○ Encapsulation
- ○ Inheritance
- ◉ Compilation
- ○ Polymorphism

Feedback

Correct ✅

Can static methods be overridden? *

- ○ Yes
- ◉ No
- ○ Sometimes
- ○ Only once

Feedback

Correct ✅

Which exception occurs when dividing by zero? *

- ○ IOException
- ◉ ArithmeticException
- ○ NullPointerException
- ○ RuntimeException

Feedback

Correct ✅

What is the parent class of all exceptions? *

- ◉ Exception
- ○ Throwable
- ○ Error
- ○ RuntimeException

Feedback

Incorrect ❌

Which keyword prevents inheritance? *

- static
- final
- private
- protected

Feedback

Correct ✅

Which block always executes? *

- try
- catch
- finally
- throw

Feedback

Correct ✅

What will be the output? *

```
String s = null;
System.out.println(s.length());
```

- ○ 0
- ○ null
- ○ Compilation error
- ◉ NullPointerException

Feedback

Correct ✅

What is upcasting? *

- ◉ Child to Parent
- ○ Parent to Child
- ○ Same class
- ○ Object creation

Feedback

Correct ✅

Constructor overloading means: *

- (●) Same name, different parameters
- ( ) Same name, same parameters
- ( ) Different name
- ( ) None

Feedback

Correct ✅

Which inheritance is NOT supported in Java? *

- ( ) Single
- (●) Multiple (classes)
- ( ) Multilevel
- ( ) Hierarchical

Feedback

Correct ✅

What will be the output? *

```
try {
   throw new RuntimeException();
} catch (Exception e) {
   System.out.print("Caught");
}
```

- ○ Caught
- ○ Error
- ◉ No output
- ○ Crash

Feedback

Incorrect ❌

What is default access modifier? *

- ○ public
- ○ private
- ○ protected
- ◉ default

Feedback

Correct ✅

What will be the output? *

```
interface A {
   default void show(){System.out.print("A");}
}
class Test implements A {
   public static void main(String[] args){
      new Test().show();
   }
}
```

- ○ A
- ◉ Error
- ○ No output
- ○ Runtime error

Feedback

Incorrect ✗

Which keyword is used to access parent constructor? *

- ○ this
- ◉ super
- ○ base
- ○ parent

Feedback

Correct ✅

What will be the output? *
System.out.println(10 + 20 + "Java" + 10 + 20);

- ◉ 30Java1020
- ○ 1020Java30
- ○ Java301020
- ○ Error

Feedback

Correct ✅

Which keyword is used for inheritance? *

- ○ implements
- ◉ extends
- ○ super
- ○ this

Feedback

Correct ✅

What is encapsulation? *

- ○ Hiding data
- ◉ Binding data & methods
- ○ Inheritance
- ○ Polymorphism

Feedback

Correct ✅

What will be the output? *

```
class A {
   static int x = 10;
}

class B extends A {
   static int x = 20;
}

A obj = new B();
System.out.println(obj.x);
```

- ○ 10
- ◉ 20
- ○ Error
- ○ Runtime error

Feedback

Incorrect ✗

What will be the output? *

```
class A {
  A(){
    System.out.print("A");
  }
}
class B extends A {
  B(){
     System.out.print("B");
  }
}

new B();
```

- ○ A
- ○ B
- ◉ AB
- ○ BA

Feedback

Correct ✅

What will be the output? *

```
class A {
   static {
      System.out.print("A");
   }
}

class B extends A {
   static {
      System.out.print("B");
   }
}

new B();
```

- (●) AB
- ( ) BA
- ( ) A
- ( ) B

Feedback

Correct ✅

Can we create object of interface? *

- ○ Yes
- ◉ No
- ○ Sometimes
- ○ Depends

Feedback

Correct ✅

Runtime polymorphism is achieved by: *

- ○ Overloading
- ◉ Overriding
- ○ Constructor
- ○ Static methods

Feedback

Correct ✅

Which concept allows multiple forms? *

- ○ Inheritance
- ◉ Polymorphism
- ○ Encapsulation
- ○ Abstraction

Feedback

Correct ✅

What will be the output? *

```
class A {
  void show(){
    System.out.print("A");
   }
}
class B extends A {
  void show(){
     System.out.print("B");
  }
}

A obj = new B();
obj.show();
```

- ○ A
- ◉ B
- ○ AB
- ○ Error

Feedback

Correct ✅

What is method overloading? *

- (●) Same name, different parameters
- ( ) Same name, same parameters
- ( ) Different name, same parameters
- ( ) None

Feedback

Correct ✅

What will happen? *

```
abstract class A {
   abstract void show();
}
class Test extends A {}
```

- ( ) Compiles
- ( ) Runtime error
- (●) Compilation error
- ( ) No output

Feedback

Correct ✅

What is method overriding? *

- ○ Same method in same class
- ◉ Same method in child class
- ○ Different method
- ○ None

Feedback

Correct ✅

Which of the following is a checked exception? *

- ○ NullPointerException
- ○ ArithmeticException
- ◉ IOException
- ○ ArrayIndexOutOfBoundsException

Feedback

Correct ✅

What is abstraction? *

- ○ Showing details
- ◉ Hiding implementation
- ○ Inheritance
- ○ Static

Feedback

Correct ✅
